A self-taught Frontend developer with great UI design skills, fast and independent learner, passionate and creative, looking for a student position in a company I could grow in and earn my future career at.

- Great JavaScript skills, experienced with ReactJS, HTML, CSS, Sass, Python. Also acquired academic experience in C.

EXPERIENCE

Electronics School Commander | IDF   2018 - 2019

- Commander of 70 officers, NCO's and soldiers in total, Responsible for the professional training and qualification of all soldiers in 7 different fields of study and oversaw 3 different combat simulators.

Defense Officer | IDF   2016 - 2018

- Commander of 20 soldiers, responsible for the technical operation and maintenance of all the electronic systems on a missile ship, and the defense of the ship from aerial threats during operational activities.

Electronic Warfare Officer | IDF   2014 - 2016

- Commander of 6 soldiers, and responsible for the operation and maintenance of E.W. systems on a missile ship (Deputy to a Defense Officer).

PROGRAMMING SKILLS

Web Development

- FigmaOP - a collection of Figma (UI design tool) plugins using Figma's Plugin API to automate and ease the day-to-day tasks of designers and developers using the platform. All of the plugins have been designed using Figma, some were coded using vanilla JS and Vanilla CSS and some using React JS and Styled-Components. To Display and lunch the plugins with ProductHunt I designed and built a site for this purpose using React JS.

  Live site: https://figmaop.netlify.app/

  Github repo: https://github.com/TalmSnir/FigmaOP-open-source-Figma-plugins

- Portfolio - VsCode style site showcasing my favorites Frontend projects and designs. built with ReactJS and Styled components according to Microsoft's style guide.

  Live site: https://talmsnir.netlify.app/

  Github repo: https://github.com/TalmSnir/Portfolio-vscode-style

- Google Drive clone - a ReactJS + Bootstrap v5 built using firebase authentication with Cloud firestore and Storage as a backend for the sake of learning firebase API and getting familiar with handling databases and authentication.

  Live site: https://google-drive-clone-firebase.netlify.app/login

  Github repo: https://github.com/TalmSnir/Googl-Drive-Clone

Programming Languages

- Python
  - Academic experience.
  - Web scraper - coded a tool using Selenium to scrape TAU phone book in order to get staff's emails and write them to a csv file.

    Github repo: https://github.com/TalmSnir/university_staff_emails_scraper

- C
  - Academic experience.
